

Jens Erven

FULL STACK DEVELOPER & MOBILE DEVELOPER

Profile

I'm a dedicated full-stack developer with a fervent passion for coding. My expertise spans JavaScript, HTML, CSS, React, Next, Kotlin and more. I derive immense satisfaction from crafting user-friendly websites and apps. A collaborative team player and eager to learn new technologies that could improve the user experience and my own workflow. I'm driven to deliver outstanding user experiences. Let's collaborate to create exceptional digital solutions!

Education

Bachelor Multimedia & Creative Technologie, Erasmus Hogeschool Brussel, Brussels

SEPTEMBER 2021 — PRESENT

Industrial Engineer Electromechanics, KU Leuven, Geel

SEPTEMBER 2020 — JUNE 2021

Unfinished

Professional Bachelor Electromechanics, Thomas More, Geel

SEPTEMBER 2017 — JUNE 2020

Graduated

Internships

Hardware Engineer at Imec, Leuven

FEBRUARY 2020 — JUNE 2020

For the study "Professional Bachelor in the Electromechanics at Thomas More"

I was entrusted with the preventive maintenance of state-of-the-art chip production equipment housed in their advanced cleanrooms. I proactively identified ways to make equipment maintenance more efficient and cost effective without compromising quality and availability. My contributions were instrumental in streamlining maintenance processes.

Relevant Student jobs

Building a Full stack website, Studio Narrata, remote

JULY 2023 — AUGUST 2023

Job description:

In my role, I led the development of a responsive, full-stack website with a primary focus on improving the listening comprehension of both children and adults. The website served as a platform where subscribers could upload narrated lectures and stories, enriching the listening experience.

Registered users enjoyed the privilege of managing their own profiles, where they could oversee their uploads. To ensure content integrity, the admin panel featured stringent controls for sensitive material validation.

MongoDB

Rest API

Additionally, the admin had the capability to expand the user experience by introducing diverse genres, languages, and dialects for users to choose from when filtering their preferred readings.

Furthermore, the admin could provide valuable tips to enhance storytelling skills, facilitating a more engaging experience for listeners. Quality control was a top priority, and all uploaded lectures underwent thorough scrutiny by the admin before being made available to users, thus ensuring a high standard of content.

Used technologies: Next.js - Typescript - HTML - CSS - Tailwind - Node.js - Github - Firebase (Storage, Cloud Firestore, Authentication)
